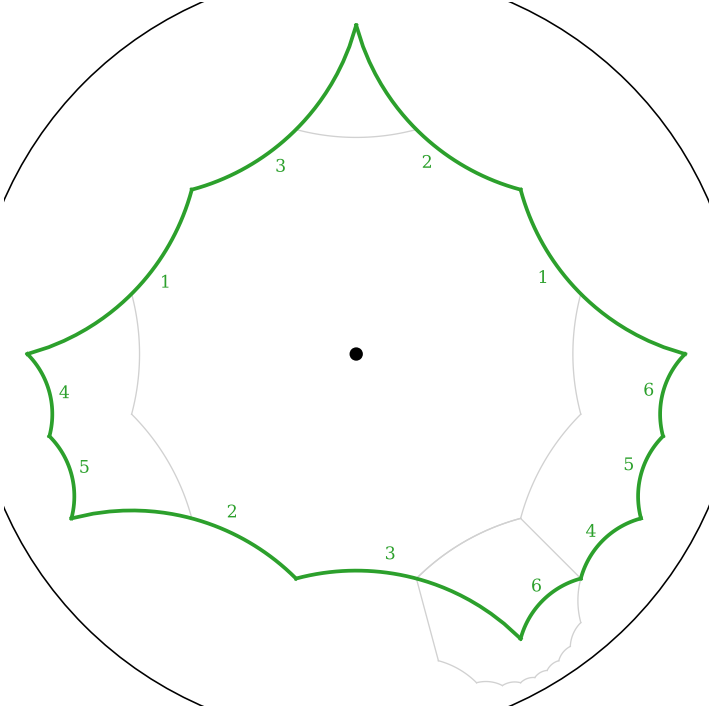
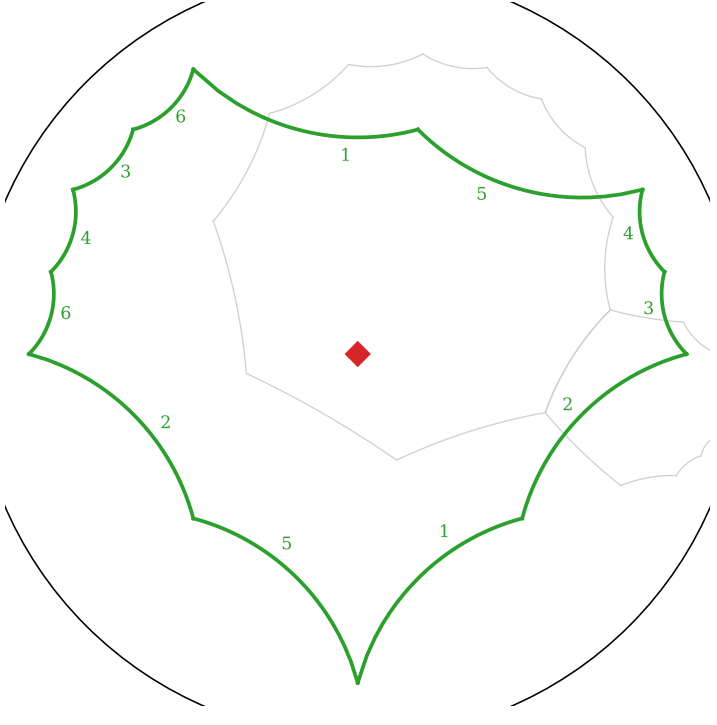
fuchs_N12#17: N = 12, k = 2, orientable, chi = -2 -- Dirichlet domains (green; sides with the same number are identified, n~ = orientation reversing)
each picture is centred at the centre of its domain; the polygons of the fundamental domain of Step 1 in grey

centred at a disc of packing 1: 12 sides, vertex cycles 6+3+3
all checks passed





centred at a disc of packing 2: 12 sides, vertex cycles 6+3+3
all checks passed
