# fuchs_N7#128: N = 7, k = 12, orientable, 2 extremal 12-packings

packing 1: 12 points drawn (one disc centred at distance 0.0 from O)
packing 2: 15 points drawn (one disc centred at distance 0.246727 from O)
isometry group of order 24: 12 conformal automorphisms and 12 anticonformal ones; 12 induced by the triangle group
7 anticonformal involutions with mirrors; 7 nontrivial isometries without fixed points
check: chi(X/Aut+) = 2, chi(X/Isom) = 1 (must be integers; the first one even)
edges with the same number are identified; n~ = orientation reversing pairing; points on the boundary of the domain appear at each of their copies
