nec_N8#20: N = 8, k = 3, non-orientable, 1 extremal 3-packing

extremal 3-packings

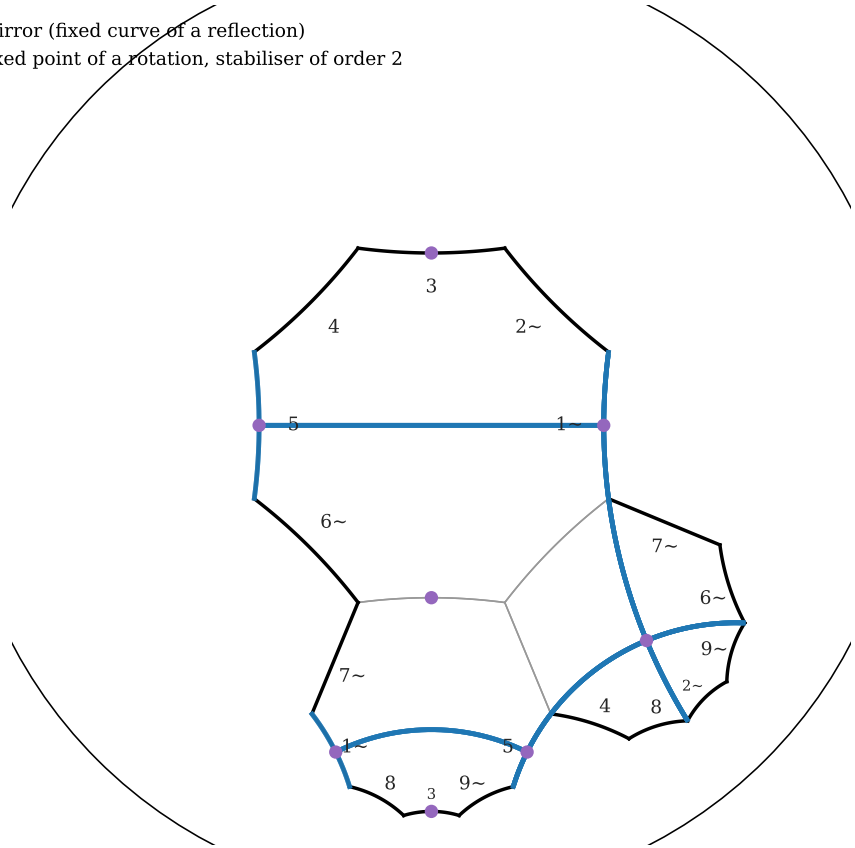

● packing 1 (uniformization)

isometries: fixed points and mirrors

mirror (fixed curve of a reflection)

fixed point of a rotation, stabiliser of order 2

packing 1: 3 points drawn (one disc centred at distance 0.0 from O)
isometry group of order 4; 4 induced by the triangle group
3 isometries with mirrors; 0 nontrivial isometries without fixed points
check: chi(X/Isom) = 1 (must be an integer)
edges with the same number are identified; n~ = orientation reversing pairing; points on the boundary of the domain appear at each of their copies
